                RequestDispatcher rd = request.getRequestDispatcher("/index.html");
                rd.include(request,response);
            }
            out.println("</body>");
            out.println("</html>");
        }
    }
}

```

## SecondServlet.java

---

```

package server;

import java.io.IOException;
import java.io.PrintWriter;
import javax.servlet.ServletException;

```

```

import javax.servlet.http.HttpServlet;
import javax.servlet.http.HttpServletRequest;
import javax.servlet.http.HttpServletResponse;

public class SecondServlet extends HttpServlet {

    @Override
    protected void doPost(HttpServletRequest request, HttpServletResponse response)
        throws ServletException, IOException {
        response.setContentType("text/html;charset=UTF-8");
        try (PrintWriter out = response.getWriter()) {
            out.println("<!DOCTYPE html>");
            out.println("<html>");
            out.println("<head>");
            out.println("<title>Servlet SeondServlet</title>");
            out.println("</head>");
            out.println("<body>");

            String name = request.getParameter("uname");
            out.println("<h1>Welcome!!! </h1>" + name);

            out.println("</body>");
            out.println("</html>");
        }
    }
}

```

## Output:

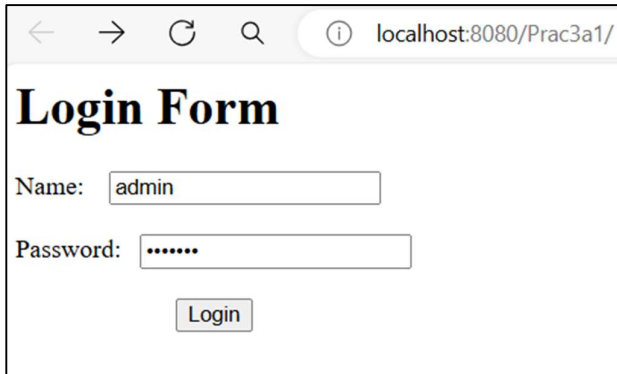

---

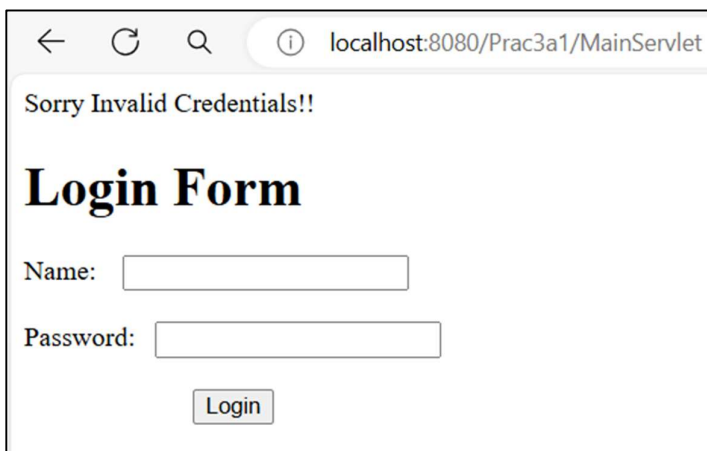

A screenshot of a web browser window. The address bar shows 'localhost:8080/Prac3a1/'. The page title is 'Login Form'. Below the title, there are two input fields: 'Name:' with the value 'admin' and 'Password:' with masked characters '.....'. A 'Login' button is positioned below the password field.

A screenshot of a web browser window. The address bar shows 'localhost:8080/Prac3a1/MainServlet'. The page displays a large 'Welcome!!!' message and the username 'admin' below it.

A screenshot of a web browser window. The address bar shows 'localhost:8080/Prac3a1/'. The page title is 'Login Form'. Below the title, there are two input fields: 'Name:' with the value 'admin' and 'Password:' with masked characters '.....'. A 'Login' button is positioned below the password field.

A screenshot of a web browser window. The address bar shows 'localhost:8080/Prac3a1/MainServlet'. The page displays the message 'Sorry Invalid Credentials!!' above a 'Login Form' title. Below the title, there are two empty input fields: 'Name:' and 'Password:'. A 'Login' button is positioned below the password field.

## Practical No. 3(b)

**Q. Create a servlet that uses Cookies to store the number of times a user has visited a servlet.**

### **CookieServlet.java**

---

```
